# My Method

## ◆ Each student Is unique.

Differences in age, flexibility and body type make everyone's ideal swing slightly different. While adhering to the fundamentals of a quality golf swing, I am flexible in my approach to each individual student. I am acquainted with the swing methods of outstanding golf teachers such as Butch Harmon, David Leadbetter, Jimmy Ballard, Jim McLean, Hank Haney, Rick Smith and Bob Rotella through attendance at their seminars. None are exactly the same, but all are fundamentally sound. Together we will find the approach that works best for you.

## ◆ 3 Major Goals

My goal for each and every student is to have them acquire clubface control, a consistent swing path and depth control, thereby eliminating mishits. I'll guide you through the process to produce your most enjoyable golf experience.

## ◆ Video

I use the V1 video format and always provide each student with an articulate and thorough visual explanation of their swing and the changes that need to be made.

## ◆ Practice

This one's up to you. My pledge is to provide you the easily understandable information necessary to build a naturally repeating, consistent swing. I will also provide you with specific drills, unique to your style to build that swing. Your hard work will be the last key element to your most enjoyable golf....ever!

*There is only one thing worse than hitting a bad shot and not knowing why. That one thing is to hit a good shot and not know why!*
